

Numeracy wk beg April 27th.

Use white rose website to consolidate fractions. Finding fractions of shapes, finding fractions of numbers but introducing fractions of objects and the bar model.

There are some video explanations and then some activities to be printed out. The children understand what a half, quarter or third is, but it is tricky to apply that knowledge, and the activities give lots of practise in doing that.

whiterosemaths.com/homelearning/year-2/

It's not wk 1 or wk 2 of the summer term you need to follow. It is wk 2 of the spring term which is above Summer term wk 1.

Unit headings:-

Recognise a third, find a third, unit fractions, non unit fractions and equivalence.
