

## Finding change warm up

1. Sometimes when you are finding change you count back on your fingers or you draw your own number line.

2. Sometimes you can find the difference by counting up in 1's or 10's.

How much more is £1 than 90p? How much bigger is £1 than 90p?  
If you took away 90p what would be left?

Practise on these before you find change.

$£1 - 80p =$	$50p - 40p =$	$50p - 23p =$
$£1 - 43p =$	$£1 - 56p =$	$20p - 16p =$
$50p - 30p =$	$£20 - £15 =$	$£50 - £25 =$
$£100 - £90 =$	$£100 - £64 =$	$10p - 9p =$
