Make Some Food Chains

Glue your pictures into the spaces in the correct order to make the food chains.

Draw arrows on your food chains to show who eats who and label the pictures, too.

A Garden Food Web

A food web is a diagram that shows who eats who in a habitat.
Some of the animals in a garden eat plants.
Others feed on their neighbours.

Plants
make the food
they need for
energy and growth
in their leaves. To
do this they need
sunlight.

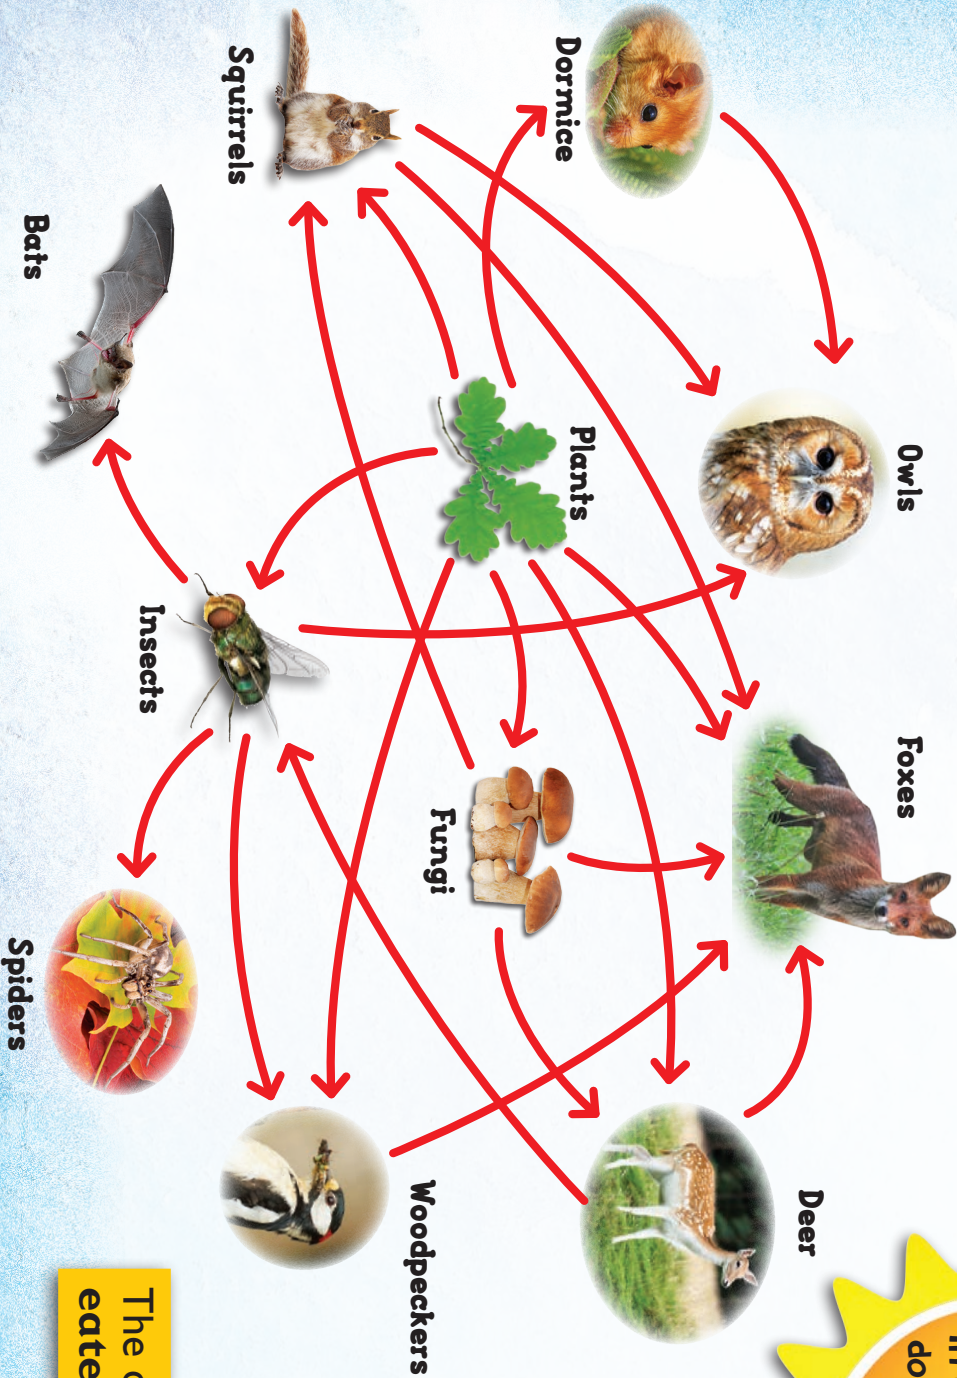

A Woodland Food Web

A food web shows who eats who in a habitat.

This food web diagram shows the connections between some of the living things in a woodland.

Plants make the food they need for energy and growth in their leaves. To do this they need sunlight.

The arrows mean:
eaten by
