

Design & Technology at Hopton Primary School

Our intent is to provide children with a DT curriculum that provides a real life context for learning. At Hopton Primary School we want to allow children to aspire through creating a variety of opportunities to progress their skills for the wider world. Through the DT curriculum, children should be inspired by designers, architects, engineers as well as chefs to enable them to create a range of mechanisms, electrical systems, structures, textiles and food products.

We teach skills that are progressive from Foundation 1 to Year 6 to ensure all children are able to build upon their prior learning. Evaluation is an integral part of the design process and allows children to reflect, adapt and improve their products. We believe this is a key skill needed throughout children's lives. DT allows children to use and apply knowledge and skills learnt from other subjects such as Science, Maths and Art.
