

## Geography at Hopton Primary School

Geography helps to provoke and provide answers to questions about the natural and human aspects of the world. At Hopton children are encouraged to develop a greater understanding and knowledge of their local environment and the diverse surroundings in the wider world, as well as their place in it. Our curriculum is designed around the core threads to ensure that teaching equips the children with an organised, easily understood and progressive structure of learning. It helps to develop knowledge and skills that are progressive, as well as transferable, throughout their time at Hopton and beyond.

We seek to inspire a curiosity and fascination about the world and the people within it; to promote the children's interest and understanding of diverse places, people, resources and natural and human environments, together with a deep understanding of the Earth's key physical and human processes. As pupils progress through the school, their growing knowledge about the world helps them to deepen their understanding of the interaction between physical and human processes, and of the formation and use of landscapes and environments.
