Dear Parent or Carer

Snap Maps

Last week Snapchat launched a new feature called Snap Map. This allows users to see the location of their contacts. It is apparently very accurate and can pinpoint locations - obviously this could be very risky.

There are 3 possible privacy settings -

Ghost Mode - only you can see your position

My Friends Mode - Any contact can see you your position

Select Friend Mode - Just those who you choose to see you

I have attached information from Childnet International for you consideration.

Thank you

Andy Blakeley
